Corporate_

Nato nel 1978, Elmar è oggi un brand dinamico, la cui identità è riconosciuta a livello internazionale.

La nostra passione è progettare, realizzare e commercializzare soluzioni d'eccellenza per gli ambienti della cucina e del bagno. In un mercato in continua evoluzione in termini di materiali, know-how e ricerca della qualità e del bello, abbiamo sempre risposto accettando sfide quotidiane e proponendo soluzioni innovative e di pregio, ma allo stesso tempo capaci di offrire soluzioni a tutte le fasce di mercato.

La nostra tradizione di cooperazione con architetti e designers ha proposto soluzioni, linee e prodotti, capaci di dialogare con qualsiasi soluzione architettonica e di spazio. In particolare, dando forma alle potenzialità e all'expertise quarantennale dell'azienda, lo studio C+S Architects ha disegnato @HOME SYSTEM, un sistema che traduce il lifestyle italiano in uno spazio ricco di soluzioni esclusive e personalizzazioni, uno spazio sospeso tra tradizione e innovazione.

Lavorando con lo studio di Carlo Cappai e Maria Alessandra Segantini, grazie alla loro particolare sensibilità nell'uso dei materiali, della tecnologia e della luce, abbiamo spostato l'attenzione dall'oggetto architettonico al sistema di relazioni con lo spazio, progettando e realizzando un nuovo sistema capace di reinventare la casa attraverso una serie di nuove relazioni tra gli ambienti. @HOME SYSTEM trasforma la cucina da macchina funzionale in spazio da abitare, estendendo il proprio ambito a tutta la casa e costruendo l'atmosfera e le relazioni tra lo spazio e i suoi abitanti, per farli stare bene, a casa.

.e

First established in 1978, Elmar has become a dynamic brand with a strong identity, which is

recognized internationally.

Our passion is to design, develop and market outstanding furnishing items for kitchen and bathroom spaces. We have a tradition of accepting new challenges. In a market which is evolving continuously in terms of material innovation, know-how, cutting-edge technological solutions, we always respond proposing innovative, elegant, precious and customizable solutions for all the targets of the market.

Our cooperation with architects and designers ensures that our range of products and systems elegantly dialogue and fit any architectural style or spatial intervention. More specifically, by giving shape to the company's potential and four decades of experience, C+S Architects has designed @HOME, a system that translates the Italian lifestyle into a comfortable living space balanced between tradition and innovation and rich with exclusive and customizable solutions.

Working with the architectural firm of Carlo Cappai and Maria Alessandra Segantini, who have remarkable sensitivity in the use of materials and light as well as for their research for innovative solutions, we shifted the focus from the architectural object to the system of relationships that the object establishes with the environment and we have succeeded in developing a system that reinvents the living spaces through a series of new relationships between all the living spaces. @HOME SYSTEM transforms the kitchen from an efficient machine to a living space, extending the kitchen boundaries and encouraging the relationships between the space and its inhabitants, so that they can feel comfortable in their home.

Bathroom_

.elmar interpreta il bagno in stile contemporaneo con una proposta che esprime grande versatilità di cromie e texture e ampia trasversalità in termini di prezzo.

Materiali pregiati e ricercati come l'argilla e le laccature metalliche convivono con i materiali di ultima generazione come i decorativi e gli acrilici.

Soluzioni e sistemi pensati per spazi intimi, reali e concreti.

Modularità che assecondano composizioni in grado di valorizzare spazi di piccole dimensioni o di esprimersi al meglio in ambienti più estesi.

Le basi sono sempre sospese e disponibili in due profondità; la gamma dei top è molto ampia, dai marmi ai materiali di nuova generazione, con possibilità di inserire sia le vasche integrate che i lavabi in appoggio.

Colonne sospese e una accurata selezione di accessori completano l'offerta.

.e

.elmar puts a contemporary spin on the bathroom with an extremely versatile offer in terms of colours and textures, and a wide range of prices.

Sophisticated, stylish materials such as clay and metallic lacquer are combined with cutting-edge elements such as decorations and acrylics.

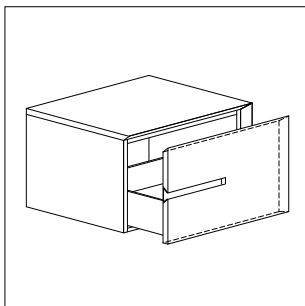

Solutions and systems conceived for real-life, intimate spaces.

A modular system that can be adapted to make the most of small spaces or to showcase bigger spaces

The base cabinets are always wall mounted

and come in two depths; there is a wide choice of counter tops ranging from marble to new-generation materials with the option of inserting a built-in or above-counter basin.

The offer is completed by floating columns and an impeccable selection of accessories.
